

Coins for the Cure!

- **Do you know that October is National Breast Cancer Awareness Month?**
 - **Do you know that in the past year an 2.5 million people are known as “Survivors” of breast cancer due to advancements made in research for the treatment of the disease?**
- **Do you know that together we can make a difference?**

As part of the fourth grade math curriculum, students learn and practice money counting skills. In conjunction with these lessons, fourth grade is sponsoring Coins for a Cure. Throughout the month of October, students and staff throughout the building will have opportunities to donate coins. Fourth grade students will then count and total these donations to apply their money counting skills, and all moneys will then be donated to the American Cancer Society from Allegheny #1 Elementary.

There will be a pink collection cup in each classroom in which coins can be placed. A school collection jar will be place in the cafeteria each day so students can see how the collection is going.

Remember, Together, we CAN make a difference!
